

Climate Change Working Group

REPORT

February 2020

No meetings have taken place, however various correspondence has been traded via email.

The village WI groups have asked about planting trees on public land in the village as part of a nationwide initiative in collaboration with the Woodland Trust. It is proposed that the WG identify & evaluate potential locations from the bank of Parish and Dorset Council owned land that may be suitable before submitting a more formal proposal.

Results from the recent village climate survey are being presented in a separate paper to Full Council

A Climate Emergency Action Plan is also being presented at full council for approval.
